

I claim:

1. A bait station comprising: a pest channel, a bait tube, said pest channel affixed to said bait tube and in fluid communication therewith, a shroud, said shroud defining an opening therein, said bait tube positioned in said shroud opening.
2. The bait station of claim 1 wherein said shroud is flexible.
3. The bait station of claim 1 wherein said shroud comprises a polymeric sheet.
4. The bait station of claim 1 further comprising an anchor, said anchor attached to said bait tube.
5. The bait station of claim 1 further comprising a first anchor guide, said first anchor guide attached to said bait tube.
6. The bait station of claim 5 further comprising a second anchor guide, said second anchor guide attached to said bait tube.
7. The bait station of claim 4 wherein said anchor comprises a metal rod.

8. The bait station of claim 1 further comprising a cap, said cap positioned on said bait tube.
9. A bait station to eradicate yard pests comprising: a pest channel, a bait tube, said bait tube connected to and in communication with said pest channel whereby bait placed within said bait tube will pass into said pest channel.
10. The bait station of claim 10 wherein said bait tube and said pest channel are connected to form an inverted t-shape.
11. The bait station of claim 9 further comprising an anchor guide, said anchor guide attached to said bait tube, said anchor guide for maintaining an anchor.
12. The bait station of claim 9 further comprising bait, said bait contained within said pest channel.
13. The bait station of claim 12 wherein said bait comprises Chlorophacinone-Liphadione.
14. The bait station of claim 11 further comprising an anchor, said anchor positioned within said anchor guide.
